FUEL – EFFICIENT DESIGN

RE-DESIGNED BURN SYSTEM

Our trademarked, re-designed burn system increases the surface area and size of the burn pot, providing better pellet and heat distribution and maintaining consistent temperatures. This system minimizes ash, reducing the frequency for cleaning.

ADJUSTABLE REAR EXHAUST

Rear exhaust output causes heat and smoke to evenly circulate throughout the cooking chamber for the perfect result every time.

29 LB HOPPER WITH SIGHT GLASS

Cook low and slow for hours on end. Track pellet consumption with the clear view pellet indicator window and change pellet flavors with the easy-access pellet cleanout door.

REAL WOOD FLAVOR

Our 100% all-natural hardwood pellets are sourced from North America with no artificial scents or sprays used in the process. Available in 40 lb bags.
