NEW PRODUCTS IN STOCK

SMARTARC

HPC proudly presents its next evolution in outdoor ignition technology: SmartArc, an electronic tiki torch. This CSA-certified fire feature uses a 30V DC power supply system that does not require flame rectification for operation & does not require a thermocouple or pilot flame. The system monitors the ignition's voltage and output to maintain the flame. Available for natural gas and liquid propane applications!

METAL FIRE PIT ENCLOSURES

Meet Agni and Tejas, our two beautiful, all-metal fire pits. These new enclosures marry elegance and efficiency by providing out-of-the-box, turnkey simplicity and unrivaled finish quality. Select the Agni round fire pit design and pair it with our signature Penta Burner, or choose the Tejas rectangular design paired with our H-Burner. These plug-and-play fire features are the perfect fit for your backyard or outdoor living space, available with six different powder coat finishes: black, white, java, pewter, silver vein, and grey.

Agni (above) and Tejas (below)

CONCRETE FIRE PIT ENCLOSURES

Curate your outdoor living space with a beautiful concrete fire pit enclosure from HPC. This curated collection pairs ultra-light concrete with HPC's signature ignition systems and helps to make memorable moments for everyone that gathers around them. Weighing less than half of competing enclosures, they are easy to ship and install on any project including rooftops, patios and commercial applications. Install confidence with enduring concrete fire pits by HPC.

SmartARC TK Torches

CERTIFIED FOR SAFETY

Fire Pit Inserts

The proven leader in outdoor fire technology, HPC offers:

- The largest selection of CSA-certified inserts in the industry
- Inserts in a breadth of shapes and sizes that are sure to have an option to fit your application
- Three CSA-certified technologies for all inserts: Match-Lit, Push-Button / Flame Sensing, and Remote / Bluetooth Controlled Electronic Ignition
- Inserts that come complete with burner, pan and related electronics
- CSA-certified custom shapes & sizes available
- **NEW** - Linear trough and rectangular H-burner inserts now have flat pan options!

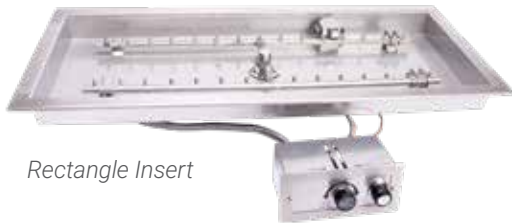

The patented SST Torpedo Burners yield an enhanced bonfire like aesthetic and the largest CSA Certified flame on the market.

Lifetime warranty on burners!

Patented Penta Burners

Blowout box protects from wind and rain. Newly designed vents for proper combustion, whatever the weather.

Innovative raised hub design – reduces unwanted water

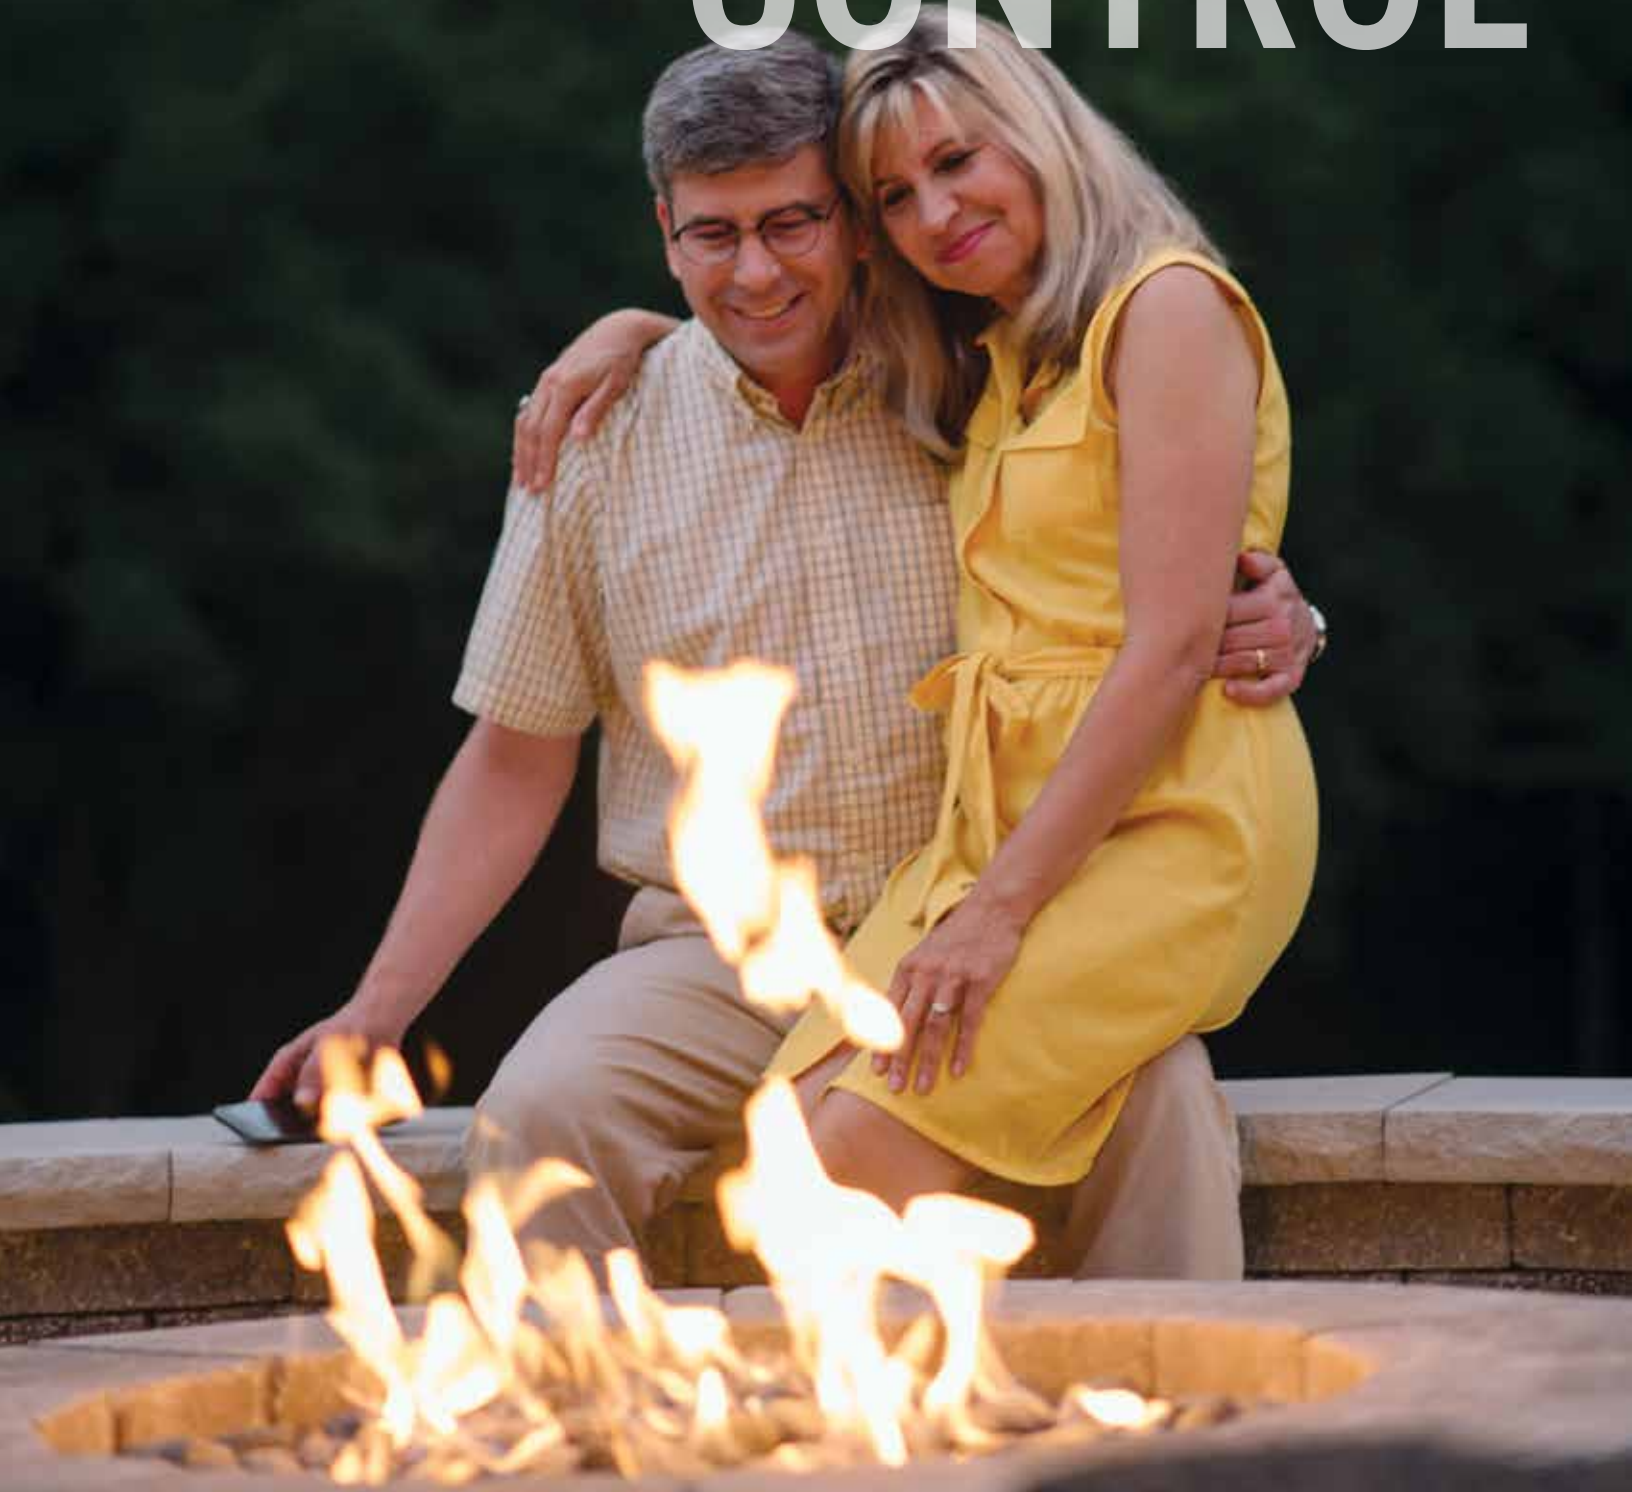

Patented five-lobe design creates a taller center flame for a campfire effect

More Penta advantages:

- Uses less fuel to attain same flame height as fire ring
- Burner holes engineered to promote natural looking flames
- Low profile design requires less media
- Available with CSA-certified Electronic Ignition systems and all of the necessary components
- Designed to shed water - no clogging or valve damage

CSA-CERTIFIED INSERTS ARE FULLY ASSEMBLED AND 100% BURN TESTED!

FLAME CONTROL

FLEXIBLE FIRE PIT SOLUTIONS

Three certified technologies to choose from

MATCH-LIT

GOOD

Match Lit (MLFPK): Simple. Reliable. Traditional. Light the fire with a match or a lighter and control gas flow with a manual key valve. The classic choice for straightforward performance.

PUSH-BUTTON /
FLAME SENSING

BETTER

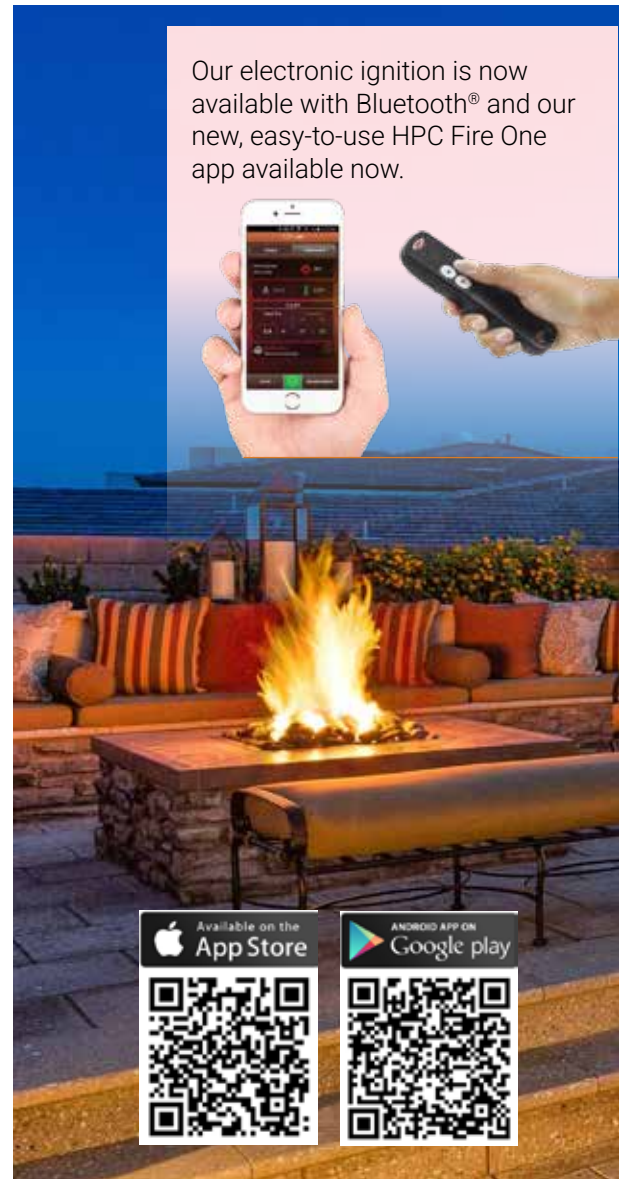

Push-Button Flame Sensing Ignition (FPPK): Push-button convenience with built-in safety. A spark ignites the pilot and flame sensing technology automatically shuts off the gas if the flame goes out. Hands-on control with peace of mind protection.

ELECTRONIC
IGNITION

BEST

Electronic Ignition (EI): Premium, smart, and fully automated. Power-driven ignition works with remotes, wall switches, timers, or smart home systems, and HI/LO models allow adjustable flame height at the tip of your fingers. Advanced flame monitoring delivers top-tier safety and effortless operation. Required for most commercial applications.

Our electronic ignition is now available with Bluetooth® and our new, easy-to-use HPC Fire One app available now.

Match-Lit Kits

For LP and NG applications. Includes burner, valve and key, flange, flex-line hose and fittings.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc.

Apple® is registered trademarks of Apple Inc.

Android™ is a trademark of Google Inc.

CUSTOM DESIGNS

FIRE FEATURES MADE JUST FOR YOU

What We Offer

We are proud to offer: **custom fire pit inserts** (CSA certified & uncertified), **custom enclosures** (concrete, metal, and ready-to-finish), as well as **individual burners and pans**.

We can produce nearly any design, from basic geometric shapes like rectangles and arches to complex forms like your home state, a favorite sports team's logo, or even a combination of shapes.

The best part about it all? Our engineered-to-order fire pits and enclosures, available with CSA certification (limits and restrictions may apply), **can ship in just two weeks.**

Getting Started

Outlining the details of your project is the first step to creating a one-of-a-kind fire feature. Consider the following:

- Installation location
- Application
- Enclosure type
- Ventilation and drainage
- Gas type
- Pan style and shape
- Burner style and shape
- Size

Certified for Safety

Safety is our top priority. That's why we offer CSA-certified custom designs. Our expert team can collaborate with you to make your dream come to life, all while upholding a high standard of safety and longevity.

DESIGN & INNOVATION

DEKKO BY HPC

Concrete Fire Pit Enclosures

HPC's signature ignition systems housed in Dekko's stunning, lightweight concrete enclosures. Available with Match Lit (precut for key valve) or Electronic Ignition units, our realistic Torpedo burners, UGO for gas compatability, and your choice of decorative stones. **Available accessories include vinyl covers, aluminum tabletop lids, and propane tank covers!**

ABOVE AND BEYOND

DEKKO BY HPC

LIGHTWEIGHT CONCRETE CLADDING is a versatile building material that offers architects and builders the flexibility to create aesthetically pleasing facades while minimizing overall load on the building's structure.

Our North-American-made concrete cladding redefines simplicity in installation. It can be effortlessly installed using basic carpentry tools and brad nails, offering builders a straightforward means to achieve a durable, visually appealing, and fire-safe architectural surface.

Dekko's craftsmanship combined with HPC's innovative technology produces products that can resist weathering and retain original form when exposed to the environment. Our products are built with longevity in mind.

STANDARD CLADDING

Standard cladding is available in 48" x 48" x 1/2" panels and can be cut on-site to fit your space, providing a cost effective solution for any project.

CUSTOM CLADDING

Cladding panels can be produced in various sizes up to 48" x 96" x 1/2". Custom raised panels are available up to 2.5" high to suit your project needs.

Aluminum Bowls

HPC's lightweight aluminum bowl offers an aesthetic appeal while boasting a powerful flame and a superior ignition system. The Aluminum Bowl series is available with two finishes: concrete and walnut. The former resembles real concrete without any of the hassle, and the latter offers a wooden aesthetic for those who prefer a warmer look over the concrete's sleek, modern appearance.

TECHNOLOGY INNOVATIONS

NEVER MISS AN ANNOUNCEMENT WITH THE HPC FIRE INSPIRED NEWSLETTER INTERESTED IN NEW PRODUCTS, PROMOS, SALES TRAINING OR SAVINGS ON PRODUCTS?

Everything that is going on at HPC delivered to your e-mail weekly. We showcase new products, tech talks, dealer portal promos and updated contacts so you have the most relevant information.

HPC FIRE ONE APP

EVERYTHING YOU NEED IN ONE APP

The new HPC One App holds all the HPC information that you would ever need. Our 3 core apps include AR for product visualization, HITS for technical information, and the HPC FIRE app, which allows you to control your Bluetooth fire pit with your cellphone.

1

HPC AR

The Augmented Reality app allows you to see our finished products in real-time to make sure the aesthetic and look are exactly what you need for the project. This app has been a big hit in the DIY community as well as contractors that want to make sure they are getting the correct fire pit or fire feature that they need.

2

HITS

The HITS app is a building instruction, tools needed, clearance given, troubleshooting beast for anyone that has an HPC Fire feature or fire pit. Simply choose the product you are working with and let the app do the rest with step-by-step instructions for any fire pit build. It starts with tools and clearances needed and goes into the step-by-step instructions of how to properly install any HPC Fire fire pit or fire feature.

3

HPC FIRE

The HPC FIRE app allows you to control the electronic ignition-High-Low models. This app allows for the kind of control you would find on a high-end sports car on your fire pit. The HPC FIRE app does a lot more than just light your fire, it allows you to change the flame height from high to low and capitalize on the ambiance you want, it allows for parental controls by password protecting the fire feature.

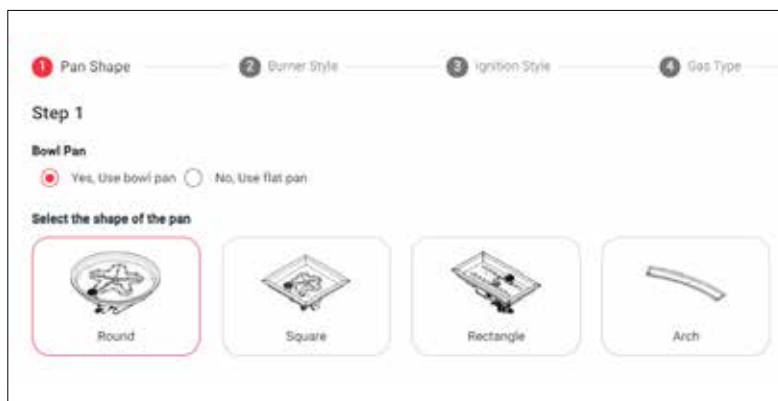

DOWNLOAD THE APP TODAY

CUSTOM FIRE PIT CONFIGURATOR

Our brand new custom fire feature configurator allows users to visualize and receive a quote for their new custom design in just a few minutes. It features easy form filling and file uploads for complicated designs, a 3D rendered version of the fire pit, and an on-the-spot estimate so you can gather all of the information that you need to get your project started. Check it out at firefab.hpcfire.com.

FORNO DE PIZ- ZA

DON'T SACRIFICE FORM OR FUNCTION. HAVE BOTH.

Forno de Pizza Ovens, a Hybrid Gas and Wood Oven

The Forno de Pizza hybrid oven was founded on the belief that some of our best experiences in life are spent with our friends and family. Cooking together with fire brings a powerful connection to the foods you're sharing. The Forno de Pizza honors timeless styling cues from ancient Greece while marrying it with modern conveniences. Designed to cook more than just pizza, the Forno is an oven for the food enthusiast.

DRUM SMOKER

THE ULTIMATE EXPERIENCE IN SMOKING

Stainless Steel Drum Smoker

The HPC Fire Inspired Stainless Steel Drum Smoker utilizes patented vortex technology to evenly smoke and cook food to perfection. Its unique design also maintains temperature better and burns wood more efficiently than competing smokers, allowing for up to an 18 hour cook time on one bag of lump charcoal. Furthermore, its tall, cylindrical design allows its user to smoke multiple food items, employing a two-rack internal structure.

Vortex technology is characterized by a dual intake vane system. The side intake tubes bring air in, the interior vanes distribute the air, and it exits through the exhaust on top, allowing for a delicious, evenly cooked meal every time.

MORE MEDIA CHOICES

Outdoor Logs

Three styles of high-performing, refractory fire logs are now available. Cast from actual pieces of wood, our outdoor refractory logs deliver unmatched realism and detail. Long-lasting and much more resistant to breakage, refractory logs fit linear, H-burner, square and round fire pits.

Arizona Weathered Oak

Aspen Birch

Western Driftwood

Lava Rocks and Stones

Lava rocks provide a base that increases combustion efficiency.

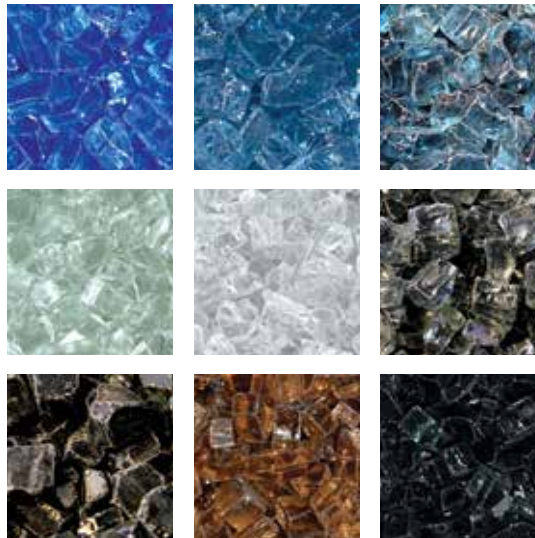

Lightweight black and multicolor river rocks withstand outdoor elements beautifully.

Rolled lava stone provides a smooth finish.

Decorative Glass

HPC has 10 colors to choose from – The glass shown - is 1/4"

Safety First. Safety Always.

Safety overrides everything here at HPC.

- Our products are designed, tested, and CSA-certified for safety
- Our NFI®-certified people are schooled in the highest standards of hearth safety protocols
- We offer a single source of family-safe fire features at HPCfire.com, with the latest safety updates on hearth products and tutorials on safe hearth practices

Safety isn't an option at HPC. It's a mandate that overrides everything, to give you the greatest peace of mind.
