Quality Construction You Can See

❶ VENTS WITH DAMPER SLIDE

For added heat retention in cold and/or windy weather

❷ STAINLESS STEEL COOKING GRID

Grid pattern prevents smaller or more delicate food items from falling through. The grid measures 24-14" x 16-1/2" and provides over 400 sq. in of grilling surface.

❸ THICK CAST ALUMINUM DRIP TRAY

The thick cast aluminum construction shields food from direct contact with the burner, reducing the chance of flare-ups, while efficiently distributing the heat across the entire grilling surface. The drip tray can also be filled with a liquid of your choice (water, broth, etc.) for steaming.

❹ STAINLESS STEEL DUAL BURNER AND VALVE ASSEMBLY

The independent controls of the dual burner provides precise heating on the right and left sides individually. This allows for an infinite amount of settings to support different grilling techniques such as two-zone or indirect grilling.

❺ EXCLUSIVE STA-KOOL HANDLE

The swivel action of the handle not only makes opening the grill easy—it remains cool to the touch even when the grill is on high heat.

❻ DRAIN PIPE VALVE

Galvanized bucket and solid brass valve provide easy draining and disposal of the grease and/or liquids from your drip tray. Especially useful after filling your drip tray with liquids for smoking.

I received my first Phoenix grill for Father's Day in 1998. It was the best grill I'd ever had and I had had several at that point. Since we cook out 2 or 3 times a week, that first Phoenix grill lasted only 14 years. Now we are on our 2nd one and it is 5 years old with no issues. I can't imagine a grill that can do all the things this one does and doing it better. No flare-ups...ever! I LOVE my Phoenix grill—we are a foodie team.
