

Pro-Fit Pre-Fab Outdoor Kitchens

Island Product Specs / Features

MADE OF

The bodies consists of a ¼" MgO board which is similar to drywall and cement board, but is stronger, fireproof, and more resistant to moisture, mold, mildew, and weather. Under the MgO board is a heavy-gauge aluminum square tube frame, along with 1/8" thick brackets.

SUN, MOISTURE, MOLD, AND MILDEW RESISTANCE

Protects your outdoor kitchen from severe elements such as ocean salt, rain, snow, and extreme temperatures. Everything is fire-resistant and UV-resistant as well.

CLASS A FIRE RATING

Pro-Fit Outdoor Kitchens do not require an insulated jacket, they do mandate a minimum of 5" spacing between appliances, while our board holds a Class A fire rating this ensures the utmost safety for your outdoor cooking space.

EXCEPTIONAL DURABILITY

Resistant to rot, splintering, and damage, providing lasting beauty.

EASY-CARE

Designed for easy wipe-clean maintenance, making upkeep a breeze.

WARRANTY

Pro-Fit cabinetry and aluminum crossbars come with a limited lifetime warranty. The decking is covered by a 20-year warranty.
